- 🔗 Tamil

PROFILE SUMMARY

Hi, I'm Nikin Shan Faizal, a passionate full-stack developer with a keen eye for detail and a love for solving complex problems. With extensive experience in building robust web applications, I have a deep understanding of both frontend and backend technologies. Beyond coding, I have a creative side that I express through videography and editing, two hobbies that allow me to explore storytelling through a different lens.

PROJECTS

- 🔗 **Openworkspace** **2024**
React, Material UI, Sendgrid, Hubspot, Stripe
 - Worked in creating a user-friendly dashboard for managing waitlist users and sending email invitations for registration.
 - Implemented user subscription management, including recurring payments and free trials..
 - Worked on the Contacts and Tickets sections, including creating model views and handling ticket management.
- 🔗 **Custommattressmakers** **2024**
Shopify, Git
 - Revamped Shopify Site to transform their outdated Shopify store into a modern, user-friendly platform. Collaborated with interdisciplinary teams to achieve research objectives.
 - Edited and customized the Shopify theme code to align with the client's specific requirements and business model.
- 🔗 **Humsum - Shopify** **2024**
Shopify, React, Node.js, Miroboard, AWS
 - Built a React dashboard with sections for orders, products, and shipping, enabling users to seamlessly add products to Shopify using Shopify APIs
 - Developed the backend for the project using Node.js to ensure smooth integration and data handling between the platform and Shopify.
 - Created detailed wireframes and planned the entire workflow to ensure efficient interaction between the dashboard, Shopify, and the admin interface.
- 🔗 **SuperMedicals** **2023**
Shopify, Dropshipping, Shiprocket, Digital Marketing
 - Built a Shopify website for a dropshipping store, integrating shipping services through Shiprocket.
 - Ran ad campaigns on Instagram and Facebook, exploring Meta Ads, and enabled Google Analytics and Meta Pixels for tracking.

PUBLICATIONS

- **Blog - Mastering Stripe Subscription Custom Checkout Flow**

Date: January 7, 2024

EDUCATION

- **Vidyaniketan Public school**
SSLC. 2014
- **KMHSS Kottakal**
Higher Secondary 2017
- **NSS College of Engineering**
BTech 2021

- **Movelist** **2023**
React, Node js, Socket.io, Twilio, Sendgrid, AWS
 - Contributed to both frontend and backend development for a product designed to simplify processes for moving companies, with separate admin and user views.
 - Integrated SendGrid for email notifications, Twilio for messaging, and implemented real-time communication using Socket.io.
 - Designed and implemented the subscription system using Stripe, handling recurring payments and user management.
 - Gained experience with AWS Cognito, Amplify, Elastic Beanstalk, RDS, Route 53, and implemented AWS Lambda triggers for handling subscription processes.
- **Humsum** **2023**
React, Internationalization (i18n), AWS
 - Built and enhanced the user interface, gaining experience with React, GraphQL, and AWS DynamoDB for seamless data management.
 - Participated in transforming the project to support both Spanish and English, ensuring full multilingual capability.
- **Taxtrack** **2023**
React, MUI, Ant Design, Formik
 - Rebuilt the outdated website for a law firm specializing in tax services.
 - Developed the frontend using React, MUI, and Ant Design to create a modern and responsive user interface.

EXPERIENCE

- **Tata Consultancy Service.** **2021 - 2022**
